

President Eisenhower Con: Integration
Washington D.C.

Sept. 18-57
Hot Springs
Ark.

Dear President Ike

I as well as lots others appreciate your patience and understanding on this integrated problem which of course I feel should be left up to the States themselves, let the Voters of each state vote on what they want and the majority of votes rule, I can't understand why the U.S. Supreme Court should have any right to over rule the wishes of the majority of Voters in any state on any particular thing the people want and majority of legal Voters vote for, where is our freedom and majority rule, when the ^{U.S.} Supreme Court rules against the will of the majority of Voters in any state they are using dictatorial powers and insulting the intelligence of the Voters of the state, and don't you think half a million Voters stand as much right to know what they want and is best for their state as nine old men of the U.S. Supreme Court who are able to stay on the job until they are in their second childhood and not qualified

on account of their aged condition, the U.S. Supreme Court is the most foolish set up in our government, and if they rule over all people why shouldn't the people have a say who is put on the U.S. Supreme Court you know they should have a right they should be elected by the public same as a president and not put in by political appointments. The present U.S. Supreme Court has caused more trouble and ill will by wanting to force intergration than all the Communists in this country, you know the majority of voters in any state should be law. No white children should be made go to school with niggers again their will ever state should have a right to vote on it and the majority rule, what right has the U.S. Supreme Court got to take the freedom away from the majority and give it to the minority any time you force the whites which are the majority to mix with the niggers ~~again~~ again their will, where is our freedom, no niggers should be forced to go with the whites again his will if this is to continue to be a free country. Respectfully
John Allen
Hot Springs Ark.
