The President

The White House

Dear Mr. President:

It was a great delight for all of us to have you stop at Massena for the purpose of inspecting the completion of our navigation facilities on the United States portion of the St. Lawrence Seaway.

I am sure you were impressed with the engineering accomplishment of this vast project. It meant much to all of us who have been engaged in achieving this goal of successful construction, to have you inspect it, and our lock and tunnel is honored by having your name associated with that portion of our facilities.

*x PP 71-2 - Pictures "C"*

Before your plane departed I delivered to one of your aides a package containing a photograph of the bronze plaque that was unveiled at dedication ceremonies last week, and this plaque will be erected in an overlook station for the public to see for many generations to come.

I personally appreciate the effort you made to include this excursion in your daily busy schedule. I am sure that our operation of these facilities will receive commendation from the shipping fraternity, and prove to be something of which your administration can well be proud.

My cordial remembrances.

Respectfully yours

Lewis G. Castle  
Administrator
